SYMPOSIUM FOR NURSES AND ALLIED HEALTH PROFESSIONALS

MONDAY 27 MAY 2024 • 08:00h-17:30h

Laureano Molins, MD, PhD, FEBTS
Chair, Local Organizing Committee

Eric Galve, Javi Martínez & Judit Armas
Nurses & Allied Health Professionals
Symposium Organizers

Dear Colleagues,

On behalf of the Nurse, Physiotherapists and other AHP committee, we extend a warm welcome to this distinguished event that brings together professionals in thoracic surgery from around the world. We are excited to offer you a unique opportunity to share knowledge, experiences, and advances in our specialties.

We particularly would like to highlight the roundtable discussions that will address the latest updates in prehabilitation, perioperative care and postoperative patient management. These discussions will be interdisciplinary, with active participation from nurses, physiotherapists, nutritionists, and other experts.

Additionally, the meeting will feature practical workshops allowing participants to acquire hands-on skills. We will also offer a guided tour of Hospital Clínic de Barcelona, providing a unique insight into our clinical environment. We want to acknowledge and reward excellence in presentation, so there will be three prizes for the best speakers, recognizing the effort and quality of contributions.

We invite you to participate by presenting your work in both poster and oral communication formats. This meeting is not only a platform for disseminating the latest research but also a space for idea exchange and collaboration among professionals from various disciplines.

Is there a better way to exchange ideas than discovering the city together at the end of the congress?

Barcelona, the cosmopolitan city of Catalonia, is a land of artists and entrepreneurs who seek in popular culture their innovative spirit and openness to the world. That's why isn't surprising to find, through its streets, traditions such as: “Tions de Nadal” at the Santa Llucia Christmas market, books and roses on Sant Jordi's day, bonfires to celebrate the summer solstice on the night of Sant Joan, “castellers” and “sardanes” in any festivity...

The gastronomy is another must when visiting Barcelona alongside their excellent local wines and cavas. The Mediterranean Sea offers a great variety of fish products (Calvet with l'Avenir streets or Balmes with Granada del Penedés streets). If you prefer meat “canelons” are best eaten in Quintana with Boqueria street. Between cultural visits you can always take a break and enjoy some “tapas” like “bravas”, “bombas barceloneta”, “esqueixada”, “pincho de tortilla”, in Muntaner street they dominate this type of cuisine.

We look forward to your active participation!
