27th ESTS MEETING

9 JUNE - 12 JUNE 2019 • DUBLIN, IRELAND

EUROPEAN CONFERENCE ON GENERAL THORACIC SURGERY

EXTRAORDINARY GUEST LECTURE

TUESDAY 11 JUNE 2019 12:30 - 13:00 H · HALL 1

David Crosby
(Kingscourt/IE)

In February 2016 David Crosby received a bilateral lung transplant. David was 40 at the time with three young children. His family were all too familiar with pulmonary problems as David, although the eldest of five, had only one surviving sister. Three of David's siblings had died before the age of 11. These were all due to respiratory problems, the nature of which was poorly understood at the time.

In 2015 his life changed as his lungs began to fail. Transplantation was his only survival hope. His transplant was a success and he set about immediately getting back to his life's rhythm. On November 5th 2017 David achieved his ambition to run the New York marathon. He succeeded and became the third lung transplant recipient ever to complete a marathon.
