

30th Anniversary of ESTS
European Society of Thoracic Surgeons
1993-2023

31st ESTS MEETING

4 - 6 JUNE 2023 • MILANO, ITALY

“Milano 2023 - Nothing like ESTS”

2nd TRAINING VILLAGE

A training village will be placed at the exhibition area where Industry partners would be able to present their product innovations and delegates can practice the techniques at the hands-on stations. Great experience for the delegate to travel from one hands-on station to the next for practical educational experience, proctored by industry & ESTS Members.

DO NOT MISS IT!

COMPANIES PARTICIPATING AT THE TRAINING VILLAGE

Medtronic

Welcome to the Medtronic training village where you will experience the amazing Synapse 3D software platform for pre-operative planning of lobectomies and segmentectomies.

- You can try our Navigational Bronchoscopy – ILLUMISITE™ PLATFORM to navigate to the lesion and biopsy it with confidence.
- Challenge yourself and try the world's first haptic 5 lobe VATS simulator and get detailed feedback of your competency and proficiency. Book your slot and practise away from patients

We look forward to welcoming you to the Medtronic training village at ESTS 2023

ETHICON

PART OF THE Johnson & Johnson FAMILY OF COMPANIES

REGISTRATION

Join Ethicon for a hands-on practical simulation training on a new anatomically accurate non-biological tactile simulator. The session is led by leading faculty and has been designed to elevate your core surgical skills in VATS Segmentectomy.

For Registration please contact your local Ethicon representative or visit the Ethicon booth

CMR Surgical is planning to have a Robotic Console with a skill Simulator in which the participant can learn how to move the robotic instruments. There will be the possibility to book 20 min of test drive and participate to a contest.

A CMR Trainer will provide a brief description of how to move the hand controllers and ask the participant to complete the assigned task. At the end of the 3 days, there will be an awards session for the best learner.

There will be also the possibility to learn more about the Versius System through a Virtual Reality simulation with 2 headset stations.

INTUITIVE

We are very pleased to welcome you to Intuitive Training Village. We invite to join us for an opportunity to experience the da Vinci technology with hands-on sessions using SimNow. You will be able to practice your skills on the updated lobectomy module, featuring improved lung tissue response and clearer guidance on body cavity limits.

The da Vinci® lobectomy exercise offers an opportunity to practice on a comprehensive set of anatomy scenarios. The exercise is unguided and allows the surgeon to determine the ideal approach to performing the steps for resection and increase proficiency in this robotic assisted technique

We look forward to welcoming you at ESTS.

European Society of Thoracic Surgeons
1993-2023

31st ESTS MEETING

4 - 6 JUNE 2023 • MILANO, ITALY

“Milano 2023 - Nothing like ESTS”

Discover how physics and technology can be used in proactive chest drain management through simple yet scientific experiments. Additionally, receive hands-on instruction with digital chest drainage systems.

For the first time at the 31st European Conference on General Thoracic Surgery in Milan, Italy, MedX-pert - the chest wall company - will participate in the Training Village.

We have been at the forefront of developing innovative implants for chest wall indications over the last few years. Today we would like to invite delegates to join us and experience the use of our implants at our hands-on stations.

Our training session will be available during all congress long and we would be delighted to welcome delegates to practice on our thoracic simulators/mannequins for the indications of ribs fixation and thoracic wall reconstruction with our X-perts.

Please reserve your spot for hands-on experience with Zephyr® endobronchial Valve placement. The Zephyr® Valve System has clinically-proven results, reliability, patient selection tools, and ease of use.

As a treatment option for the most critically ill patients, extracorporeal membrane oxygenation (ECMO) is growing in popularity around the world. Recently, the number of ECMO cases has been increasing due to the COVID-19 pandemic. When used properly, ECMO can save the lives of patients of any age who are experiencing severe circulatory and respiratory failure.

Patients that require ECMO are in a critical condition and the management of these patients is challenging. In order to implement ECMO successfully in clinical practice, education and expertise are required. Understanding the physiology of ECMO, as well as the risks involved is essential.

The training village's contents are based on the recommendations of the Extracorporeal Life Support Organization (ELSO) and include lectures of therapy basics, ultrasound guided femoral puncture and a hands-on simulation with a small troubleshooting.

TRAINING VILLAGE

The congress registration System for the Training village is now closed. In case of interest in the registration, please check on site with each company if slots are still available.
